

AROWOLO ISAAC

Software Developer & System Analyst

github.com/arowoloisaac | +7 952-883-29-64 | arowoloisaacabiodun01@gmail.com | [Portfolio](#)

I am a recent Software Engineering graduate with over 5 years of programming experience and expertise in designing and building scalable full-stack applications and APIs. Strong foundation in **System Analysis**, **Frontend** and **Backend** development, with proficiency in multiple programming languages, frameworks, and development tools. Effective collaborator with a problem-solving mindset, eager to contribute to software solutions and thrive in a fast-growing tech environment.

EDUCATION

Tomsk State University | Bachelor of Science (September 2021 - May 2025)

Faculty: Higher IT School (HITs)

Major: Software Engineering

Topics of Scientific Research: «Design and Development of a Key Management System» and «Design and Development of a Project Management System».

Offa Grammar School

High School Diploma (September 2013 - July 2019)

INTERNSHIP

Tomsk State University

Internship | Key Management System (Feb 2024 - May 2024)

I helped design, document and implement a secure web-based system for tracking physical keys, allowing authorized users to check out/return keys, set access permissions, and receive overdue alerts. Featured real-time dashboard reporting for admins. Built with React, .NET WebAPI, and MSSQL.

PROJECTS

Bank Account System – Console App

Developed a console-based banking application for managing user accounts, enabling deposits, withdrawals, balance inquiries, and transaction history. Implemented secure authentication, and

overdraft protection. Built with C#, object-oriented design patterns, and memory-based persistence.

Ordering System

Designed and implemented a scalable ordering platform, allowing customers to browse products, place & track orders, rate products, and manage profiles. Enables admins to process orders, add/update/retrieve/delete inventory, generate reports. Built with React, .NET WebAPI and MSSQL.

Food Delivery System

Designed and built a backend API food delivery platform, letting customers browse menus, place orders, track drivers, and rate services. Allow restaurants to manage menus and drivers to accept/update deliveries. Implemented .NET WebAPI and JWT authentication for security.

School Management System

Designed and implemented a full-stack web application for school administration, enabling students to view enrolled courses, assignments, grades, timetables, and assigned lecturers. Empowered lecturers to upload assignments, grades, and announcements. Built with Vue.js, .NET WebAPI, MSSQL, and JWT authentication for security.

Project Management System | Final year project (Sep 2024 - May 2025)

Designed, documented and implemented a scalable web app for project tracking, enabling individuals and teams to create tasks, assign roles, monitor progress via Kanban boards/Gantt charts, and generate reports. Supported real-time notifications, file sharing, and role-based access. Built with React (Shadcn), .NET WebAPI, and MSSQL.

SKILLS

Programming Languages: C#, Python, JavaScript, Typescript, HTML5, CSS3 and SQL.

Frameworks: .NET Core Frameworks, FastAPI, Flask, React and Vue.js.

Analysis: Use Case Diagrams, Component Diagrams, Package Diagrams, Activity Diagrams, Sequence Diagrams, Class Diagrams and Domain Diagrams.

Databases: PostgreSQL, MySQL, MongoDB MSSQL and Supabase.

Tools & Libraries: Shadcn/UI, Motion, Tailwind CSS and Bootstrap

Others: Software Testing & Debugging, Object-Oriented Programming (OOP), Data Structures & Algorithms, Git, Docker, vercel and Heroku.

HOBBIES

Football, Cooking, Movies, Music, Chess, Basketball, Checkers, Reading, Table Tennis and Running
